

# danumed® GastroTube

## Gastrostomy probe with retention balloon for long-term enteral nutrition

The danumed® GastroTube is a percutaneous gastric feeding and replacement tube made of silicone. It can replace a PEG tube after a completely healed stoma. Due to the wide range of sizes from 12 Fr to 24 Fr, almost every patient can be supplied with the perfectly fitting danumed® GastroTube.

Outstanding product features offer patient safety and comfort in application and handling.

## COMFORT

- **Extensive selection of sizes** from Fr 12 to Fr 24 for the individual and perfect fit
- **Highest patient comfort** due to soft, flexible silicone
- Soft and adjustable retention plate for **secure fixation**
- Structure of the retention plate allows better **air circulation** in the stoma site area
- **Length marking** at a distance of 2 cm
- **Display of the balloon volume** on the shaft
- **Side valve access** for balloon filling
- Valve colour coding for **easy sizing**
- **Convenient accessories** in every single package: a pack of **lubricant** for easy insertion and a **danumed® balloon syringe 10 ml** to block the retention balloon.
- **Easy to clean** and maintain

## SAFETY

- Gastric replacement feeding tube made of **high-quality medical grade silicone**
- All danumed® GastroTubes are **free of Latex, PVC, DEHP and BPA**
- **Flat rounded tip** allows atraumatic insertion
- **Recessed tip** to prevent trauma
- High balloon stability of the inner retention balloon for **long usage and secure fixation**
- **ENFit®** connectors according to EN ISO 80369-3 avoid tubing misconnections with other systems
- Available with **ENFit® and Y-ENFit®** connectors
- **Radiopaque stripe** along the shaft

## danumed® GastroTubes with ENFit® and Y-ENFit®
